

# National Forest Explorer App

This official app is a portal for exploring the diverse lands and heritage sites managed by the U.S. Forest Service. A powerful exploration tool, this app allows you to discover forests near you and can help you explore each destination's points of interest. Use this app for easy access to forest facts, natural, cultural, and historic information, offline and GPS maps, recreational opportunities, and other essential visitor information to enjoy our National Forests and Grasslands.

The perfect companion for your next forest adventure or armchair travels, each app was developed by the forest unit's rangers and interpretive staff and features a variety of content, including educational audio tours and natural and historic imagery. Each forest destination can be downloaded individually from the portal, allowing you to stay up to date with your favorite destinations through push notifications alerts for closures and events.

**The Cradle Of Forestry In America Has Joined The National Forest Explorer Team!  
You Can Now Download Our Site Listed Under "Select A Forest" [Pisgah National Forest/Cradle Of Forestry](#)**

**Download the App to hear the Audio Walking Tour for The historic Biltmore Campus Trail. You will hear the trail come to life with music and insight into the birth of scientific forestry in America.**

**Available Through:**
